SUMMARY

Senior Software Engineer with 4+ years of experience building scalable backend systems, fintech platforms, distributed services, and enterprise applications. Specialized in designing secure, high-performance APIs and payment infrastructure that support large-scale financial operations.

Experienced in microservices architecture, distributed transaction management, event-driven systems, database optimization, and cloud-native application development. Proven ability to architect reliable systems, improve platform performance, and deliver production-ready solutions that process billions of birr in financial transactions.

Contributed to major fintech and digital payment platforms including StarPay, EthioPay, CashGo, GetFee Enterprise, and Dashen Super App integrations, supporting thousands of users across Ethiopia.

CORE COMPETENCIES

- Backend Engineering
- FinTech Systems
- Distributed Systems
- Microservices Architecture
- Event-Driven Architecture
- REST API Design
- Payment Processing Systems

- Database Optimization
 - Cloud-Native Applications
 - Distributed Transactions (Saga Pattern)
 - System Design
 - CI/CD & DevOps
 - Performance Optimization
 - Software Architecture
-

EXPERIENCE

Senior Software Engineer

EagleLion System Technologies | Addis Ababa, Ethiopia
August 2024 – Present

- Architect and develop scalable backend services and financial transaction systems using Node.js, TypeScript, PostgreSQL, MongoDB, and Redis.
- Design secure APIs powering payment processing, wallet services, merchant integrations, and enterprise financial platforms.
- Reduced response times of critical services to under 100ms through database tuning, caching strategies, and architecture improvements.
- Refactored legacy applications into modular microservice architectures, improving maintainability and scalability.
- Implemented Docker-based deployment workflows and GitHub Actions CI/CD pipelines to streamline software delivery.
- Developed secure authentication and authorization mechanisms using JWT and role-based access control.
- Collaborate with product, frontend, QA, and DevOps teams throughout the software development lifecycle.
- Produce API documentation and integration standards using Swagger/OpenAPI.

Software Engineer

EagleLion System Technologies | Addis Ababa, Ethiopia
May 2023 – September 2023

- Developed backend APIs and enterprise services using Node.js, Express.js, MongoDB, and PostgreSQL.
- Implemented authentication, authorization, and secure API middleware.

- Optimized database indexing and aggregation pipelines, improving search and filtering performance by over 40%.
 - Built recruitment workflows, candidate matching systems, and business automation services.
 - Participated in system design discussions, code reviews, testing, and production deployments.
-

SELECTED FINTECH PROJECTS

StarPay Ethiopia

Digital payment platform serving merchants and consumers across Ethiopia.

Contributions:

- Built secure backend APIs for transaction processing and wallet services.
- Developed merchant integration services and financial reporting modules.
- Improved platform scalability, security, and transaction reliability.

Ethiopay

National digital payment ecosystem supporting interoperable payment services.

Contributions:

- Developed secure financial transaction workflows and backend integrations.
- Implemented Saga-based transaction coordination mechanisms.
- Improved transaction consistency and resilience across distributed services.

GetFee Enterprise Platform

Large-scale payment and fee collection platform.

Contributions:

- Developed backend services supporting payment workflows and reconciliation processes.
- Contributed to systems processing over **60 Billion ETB** in transactions.
- Built secure integrations with financial institutions and enterprise systems.

CashGo – Bank of Abyssinia

Mobile banking and digital wallet platform.

Contributions:

- Developed APIs for authentication, transaction processing, and banking integrations.
- Improved scalability and reliability of financial services.

Dashen Super App Integrations

Contributions:

- Built backend services and integrations supporting high-volume financial transactions.
 - Optimized API performance and service reliability.
-

ENGINEERING HIGHLIGHTS

Distributed Transaction Management

Implemented Saga-based transaction orchestration and compensation workflows within fintech ecosystems to ensure transactional consistency across distributed services.

High-Performance API Design

Designed and optimized APIs capable of supporting large-scale financial operations while maintaining low-latency response times and high availability.

Payment Infrastructure

Built and maintained secure payment processing systems, wallet platforms, reconciliation services, and banking integrations handling high transaction volumes.

System Scalability

Designed backend architectures capable of supporting enterprise growth through microservices, caching strategies, database optimization, and cloud-native deployment practices.

TECHNICAL SKILLS

Languages

Go • Rust • TypeScript • JavaScript • Python • Dart

Backend Technologies

Node.js • Express.js • REST APIs • Microservices • Event-Driven Systems • Clean Architecture • API Gateway Design

FinTech & Distributed Systems

Payment Systems • Wallet Services • Distributed Transactions • Saga Pattern • Financial Integrations • Reconciliation Systems • Merchant Platforms

Databases

PostgreSQL • MongoDB • MySQL • Redis

DevOps & Cloud

Docker • Kubernetes • GitHub Actions • CI/CD • Linux

Tools

Git • Swagger/OpenAPI • Prisma ORM • Postman

EDUCATION

Bachelor of Science (B.Sc.) in Software Engineering

Jimma University

2019 – 2024

PERSONAL PROJECT

PayFlow

A distributed payment processing platform inspired by modern payment providers such as Stripe.

Technologies: Go, PostgreSQL, Redis, Docker, Microservices

Features:

- API Gateway
 - Distributed Transactions
 - Event-Driven Architecture
 - Payment Processing Services
 - High-Throughput System Design
-

INTERESTS

Distributed Systems • FinTech Innovation • System Design • Cloud Architecture • Football (Arsenal) • Psychology • Personal Development
