

TAMIRAT GUDA ALI

Backend Engineer | FinTech & Distributed Systems

Addis Ababa, Ethiopia

+251 944 365 493 | amenguda@gmail.com

LinkedIn: linkedin.com/in/ethanguda | GitHub: github.com/Ammen1

SUMMARY

Backend Engineer with experience designing and building fintech platforms, payment infrastructures, wallet systems, and distributed transaction-processing services. Skilled in microservices architecture, event-driven systems, API design, database optimization, and cloud-native application development. Experienced in delivering scalable, reliable, and high-performance backend systems for enterprise financial applications, with a strong focus on fault tolerance, observability, security, and operational efficiency.

EXPERIENCE

Backend Engineer

Eagle Lion System Technologies | Addis Ababa, Ethiopia

Aug 2024 – Present

- Design and develop scalable fintech backend systems using Node.js, TypeScript, PostgreSQL, MongoDB, and Redis.
- Build secure payment processing, wallet, merchant, and transaction management services.
- Develop and maintain REST APIs supporting enterprise-scale financial applications.
- Refactor monolithic applications into microservices architectures, improving scalability, maintainability, and deployment efficiency.
- Optimize backend performance through caching, database tuning, and efficient system design, reducing API latency to under 100ms.
- Implement distributed transaction workflows using Saga patterns to improve consistency and reliability across services.
- Develop authentication and authorization systems using JWT and RBAC.
- Collaborate with product, frontend, QA, DevOps, and business stakeholders to deliver production-grade systems.
- Create and maintain API documentation using Swagger/OpenAPI.

Key Platforms Delivered

- **StarPay Ethiopia** Payment processing and wallet platform supporting 300,000+ merchants and enabling secure digital transactions across multiple payment channels.
- **Ethiopay** National payment integration platform connecting financial institutions and enabling high-volume distributed transaction processing across interoperable payment networks.
- **GetFee Enterprise Platform** Agri-fintech billing, reconciliation, and payment platform that has processed 60B+ ETB in transaction volume, supporting large-scale agricultural financing and payment operations.
- **Dashen Super App** Banking and wallet ecosystem serving 2M+ users and supporting 10M+ ETB in daily transaction volume across digital financial services.
- **CashGo** Cross-border remittance platform facilitating secure international money transfers and multi-channel payment processing.
- **TeleTv** Digital subscription and payment platform supporting large-scale customer onboarding, recurring payments, and service integrations.

Software Engineer

Eagle Lion System Technologies | Addis Ababa, Ethiopia

May 2023 – Sep 2023

- Developed RESTful APIs using Node.js, Express.js, PostgreSQL, and MongoDB.
- Built authentication and authorization systems for enterprise applications.
- Improved database performance by over 40% through indexing and query optimization.
- Developed workflow automation and recruitment management systems.
- Participated in architecture discussions, code reviews, testing, and production deployments.

Full-Stack Developer

Innovation Incubation Center, Jimma University | Jimma, Ethiopia

Sep 2023 – Jun 2024

- Developed full-stack applications using Django, React, Redux, PostgreSQL, and Tailwind CSS.
- Built and maintained scalable APIs and backend services.
- Contributed to the development of Goderash, a multi-service automotive platform integrating fuel, insurance, and vehicle-related services.
- Improved maintainability and performance through modular architecture and code refactoring.

Full-Stack Developer

Ethiopian Artificial Intelligence Institute | Addis Ababa, Ethiopia

Apr 2023 – Aug 2023

- Developed AI-powered web applications using Django and React.
- Built multilingual translation systems and backend services.
- Integrated machine learning models into production-ready applications.
- Contributed to the development of a coffee leaf disease prediction platform.

CORE EXPERTISE

- Distributed Systems
- Microservices Architecture
- Event-Driven Architecture
- Payment Processing Systems
- Wallet Platforms
- Transaction Processing
- API Design & Development
- Database Optimization
- System Scalability
- Reliability Engineering
- Observability & Monitoring
- Cloud-Native Applications

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Go, Python, Rust, Dart
- **Backend Technologies:** Node.js, NestJS, Express.js, Django, Go Services, Rust Services, REST APIs, GraphQL, gRPC
- **Databases:** PostgreSQL, MongoDB, MySQL, Redis
- **Messaging & Streaming:** Apache Kafka, RabbitMQ
- **Architecture:** Microservices, Distributed Systems, Event-Driven Architecture, Saga Pattern, Idempotency, System Design
- **Observability:** OpenTelemetry, Distributed Tracing, Logging, Monitoring, Grafana
- **DevOps & Infrastructure:** Docker, Kubernetes, CI/CD, GitHub Actions, Linux, Git
- **Tools & Platforms:** Swagger/OpenAPI, Prisma, Postman, Jira, JWT, RBAC, Turborepo
- **Domain Expertise:** FinTech Systems, Payment Infrastructure, Wallet Platforms, Financial Reconciliation, Backend Architecture, Performance Optimization

KEY ACHIEVEMENTS

- Improved transaction reliability by 60% through architecture optimization and resilient workflow design.
- Reduced API latency to under 100ms using Redis caching, query optimization, and database tuning.
- Automated CI/CD pipelines, reducing deployment time by 40% and improving release efficiency.
- Improved system consistency by 30% through Saga-based distributed transaction workflows.
- Increased reporting and query performance by over 40% through indexing and schema optimization.
- Contributed to enterprise-scale fintech platforms supporting high-volume financial transactions.

EDUCATION

Bachelor of Science (BSc) in Software Engineering

Jimma University
2019 – 2024

ADDITIONAL INFORMATION

Location: Addis Ababa, Ethiopia

Languages: English (Professional Working Proficiency), Amharic (Native)
